

Academic Operations Manual

Introduction

The Academic Operations Manual serves as the primary reference document for administrators responsible for managing academic programs, courses, faculty assignments, student enrollments, assessments, attendance systems, and institutional reporting within the Learning Management System (LMS).

This document defines operational procedures, governance standards, responsibilities, and workflows required to ensure efficient academic administration.

This manual applies to:

- Academic Administrators
- Program Coordinators
- LMS Administrators
- Department Heads
- Academic Operations Teams

Chapter 1: Academic Operations Structure

The academic management hierarchy follows:

```
graph TD; Institution --> Academic_Director[Academic Director]; Academic_Director --> Department_Head[Department Head]; Department_Head --> Academic_Coordinator[Academic Coordinator]; Academic_Coordinator --> Teachers; Teachers --> Students;
```

Institution
↓
Academic Director
↓
Department Head
↓
Academic Coordinator
↓
Teachers
↓
Students

Each level has specific responsibilities and reporting obligations.

Chapter 2: Administrator Responsibilities

Administrators are responsible for:

Academic Planning

- Course creation
- Batch planning
- Faculty allocation

Academic Monitoring

- Attendance tracking
- Performance monitoring
- Completion analysis

System Administration

- User management
- Permission management
- LMS configuration

Reporting

- Academic reports
- Compliance reports
- Performance reports

Chapter 3: Course Management

Administrators create and maintain course records.

Each course should contain:

Basic Information

Course Title
Description
Duration
Price
Category

Academic Information

Modules
Assignments
Learning Outcomes
Assessments

Before publication:

- ✓ Description Complete
- ✓ Modules Added
- ✓ Outcomes Defined
- ✓ Resources Uploaded

Chapter 4: Batch Creation Process

Batches represent groups of students enrolled in a course.

Example:

MERN-2026-A
MERN-2026-B
AI-2026-A

Batch setup includes:

Course Association

Start Date

End Date

Capacity

Assigned Faculty

Workflow:

Create Course
↓
Create Batch

↓
Assign Teachers
↓
Open Enrollment

Chapter 5: Student Enrollment Management

Students may enroll in one or more courses.

Enrollment process:

Student Registration
↓
Eligibility Check
↓
Course Selection
↓
Batch Allocation
↓
Enrollment Confirmation

Administrators should regularly verify enrollment accuracy.

Chapter 6: Faculty Assignment Management

Teachers must be assigned to appropriate batches.

Assignment considerations:

Expertise

Availability

Workload Balance

Certification Requirements

Example:

Batch

Primary Instructor

Supporting Instructor

Chapter 7: Academic Calendar Management

Administrators maintain:

Course Start Dates

Holidays

Assessment Windows

Project Reviews

Completion Deadlines

The academic calendar should be published before course commencement.

Chapter 8: Learning Resource Management

Administrators oversee:

Course Documents

Recorded Classes

Assessments

RAG Knowledge Base Documents

Resources should be:

- Organized
- Updated
- Properly categorized

Chapter 9: Role-Based Access Control

The LMS follows role-based permissions.

Students

Access:

Courses
Assignments
Attendance
Resources

Teachers

Access:

Assigned Courses
Assigned Batches
Student Progress

Administrators

Access:

All Academic Data
Reports
Configurations
User Management

Chapter 10: User Management

Administrators manage:

Student Accounts

Teacher Accounts

Admin Accounts

Tasks include:

- Account creation
- Role assignment
- Account deactivation
- Password resets

Chapter 11: Attendance Governance

Administrators monitor:

Batch Attendance

Course Attendance

Student Attendance Trends

Thresholds:

Above 90% → Excellent

75-90% → Acceptable

Below 75% → Review Required

Chapter 12: Assignment Management

Administrators oversee:

Assignment Publication

Submission Tracking

Evaluation Status

Grade Publication

Audit checks should ensure:

- ✓ Deadlines Set
- ✓ Rubrics Available
- ✓ Grades Published

Chapter 13: Assessment Governance

Assessments should follow institutional policies.

Types:

Assignments

Projects

Viva

Internal Tests

Final Evaluations

Assessment schedules should be communicated in advance.

Chapter 14: Academic Integrity Management

Administrators monitor:

Plagiarism

Academic Misconduct

Unauthorized Collaboration

Assessment Violations

Investigation workflow:

```
Report Received
  ↓
Evidence Review
  ↓
Committee Evaluation
  ↓
Decision
```

Chapter 15: Student Performance Monitoring

Key indicators:

Attendance

Assignment Completion

Assessment Scores

Course Progress

Categories:

```
Excellent
Good
Needs Attention
At Risk
```

Chapter 16: Teacher Performance Monitoring

Metrics:

Attendance Accuracy

Evaluation Timeliness

Student Feedback

Course Completion Rate

Teaching Effectiveness

Performance reports should be reviewed periodically.

Chapter 17: Progress Tracking

Administrators should monitor:

Modules Completed
Assignments Completed
Attendance Percentage
Overall Progress

Progress analytics help identify bottlenecks and intervention needs.

Chapter 18: LMS Reporting System

Reports available:

Student Reports

Teacher Reports

Attendance Reports

Assignment Reports

Course Reports

Institutional Reports

Reports support data-driven decision-making.

Chapter 19: RAG Knowledge Base Administration

Administrators manage documents used by the AI chatbot.

Responsibilities:

Upload Documents

Categorize Content

Manage Access Rights

Archive Outdated Documents

Document categories:

Student Documents
Teacher Documents
Admin Documents

Chapter 20: Data Quality Management

Administrators should regularly audit:

User Records

Course Records

Enrollment Data

Attendance Records

Assessment Data

Quality checks prevent reporting errors.

Chapter 21: Escalation Procedures

Escalation categories:

Technical Issues

Academic Misconduct

Faculty Concerns

Student Complaints

Workflow:

```
graph TD;
    Issue --> Coordinator;
    Coordinator --> Administrator;
    Administrator --> DepartmentHead[Department Head];
```

Chapter 22: Academic Audits

Periodic audits should review:

Attendance Accuracy

Assessment Consistency

Faculty Compliance

Student Outcomes

Audit findings should be documented and resolved.

Chapter 23: Data Privacy and Security

Academic data must be protected.

Sensitive information includes:

```
graph TD;
    Grades;
    Attendance;
```

Access should follow least-privilege principles.

Chapter 24: Backup and Recovery

Administrators should ensure:

Database Backups

Document Backups

LMS Configuration Backups

Recovery Testing

Regular backups reduce operational risks.

Chapter 25: Course Closure Process

Upon course completion:

Finalize Grades

Verify Attendance

Archive Materials

Generate Reports

Close Batch

Checklist:

- ✓ Grades Finalized
 - ✓ Attendance Verified
 - ✓ Resources Archived
 - ✓ Reports Generated
 - ✓ Batch Closed
-

Chapter 26: Institutional KPIs

Administrators should track:

Enrollment Growth

Course Completion Rate

Student Satisfaction

Faculty Performance

Placement Rate

Attendance Trends

KPIs support long-term academic planning.

Chapter 27: Continuous Improvement

Academic operations should continuously improve through:

- Student feedback
- Faculty feedback
- Industry requirements
- Academic audits
- Technology upgrades

Regular reviews ensure institutional excellence.

Summary

The Academic Operations Manual provides comprehensive guidance for managing courses, batches, enrollments, faculty assignments, attendance, assessments, reporting, audits, and LMS administration. By following these procedures, administrators can ensure efficient academic operations, maintain institutional standards, support student success, and enable data-driven decision-making across the organization.
