

# Attendance Management Policy

## Introduction

Attendance is an important indicator of student engagement, participation, and commitment to learning. This policy establishes standardized procedures for recording, monitoring, calculating, and managing attendance across all courses delivered through the Learning Management System (LMS).

The objectives of this policy are to:

- Promote regular participation
- Improve learning outcomes
- Maintain academic accountability
- Standardize attendance procedures
- Ensure fairness and transparency

This policy applies to:

- Students
- Teachers
- Teaching Assistants
- Academic Coordinators
- Administrators

---

## Chapter 1: Purpose of Attendance Tracking

Attendance helps institutions:

### **Monitor Engagement**

Track student participation in learning activities.

### **Identify At-Risk Students**

Detect learners requiring intervention.

### **Support Academic Success**

Students with higher attendance generally perform better academically.

### **Maintain Records**

Provide accurate academic documentation.

---

## Chapter 2: Attendance Components

Attendance may be recorded through:

### Live Classes

Examples:

```
```text id="lc1" Online Lectures Workshops Lab Sessions Mentoring Sessions
```

```
### Practical Sessions
```

Examples:

```
```text id="lc2"
Coding Labs
Project Reviews
AI Workshops
Deployment Sessions
```

### Mandatory Events

Examples:

```
```text id="lc3" Assessments Presentations Viva Sessions
```

```
---
```

```
# Chapter 3: Attendance Status Types
```

```
The LMS supports the following attendance statuses:
```

```
### Present
```

```
Student attended and actively participated.
```

```
```text id="att1"
Status: Present
```

### Absent

Student did not attend.

```text id="att2" Status: Absent

### Late

Student joined after the scheduled start time.

```text id="att3"

Status: Late

## Excused Absence

Approved absence due to valid reasons.

```text id="att4" Status: Excused

---

# Chapter 4: Attendance Recording Process

Attendance should be recorded for every live session.

Workflow:

```text id="flow1"

Class Conducted

↓

Attendance Verified

↓

Attendance Recorded

↓

Attendance Saved

Attendance records should be updated immediately after each session.

---

## Chapter 5: Teacher Responsibilities

Teachers must:

### Before Class

- Verify student list
- Ensure attendance tools are available

## During Class

- Monitor participation
- Verify student presence

## After Class

- Mark attendance
- Resolve discrepancies
- Submit attendance records

Teachers are responsible for maintaining accurate attendance data.

---

# Chapter 6: Student Responsibilities

Students must:

## Join Classes On Time

## Participate Actively

## Maintain Stable Internet

## Report Technical Issues Promptly

Students should regularly review attendance records in the LMS.

---

# Chapter 7: Minimum Attendance Requirement

Recommended minimum attendance:

```text id="min\_att" 75%

Students falling below the required threshold may:

- Receive warnings
- Require counseling
- Become ineligible for certain assessments

Institution-specific rules may apply.

---

## # Chapter 8: Attendance Calculation

Formula:

```
```text id="formula1"
Attendance Percentage

=
(Classes Attended ÷ Total Classes)

× 100
```

Example:

```
```text id="formula2" Attended Classes = 18
```

Total Classes = 20

Attendance = 90%

```
---

# Chapter 9: Late Attendance Policy

A student may be marked Late if they join after the official start time.

Recommended thresholds:

```text id="late1"
0-10 Minutes → Present

10-20 Minutes → Late

More than 20 Minutes → Absent
```

Institutions may customize these values.

---

## Chapter 10: Excused Absence Policy

Valid reasons may include:

## Medical Emergency

## Approved Academic Activity

## Family Emergency

## Official Institutional Event

Students must submit supporting documentation when required.

Approval authority:

```text id="excused\_flow" Student ↓ Teacher ↓ Coordinator

---

### # Chapter 11: Attendance Corrections

Students may request corrections if:

- Technical issues occurred
- Attendance was marked incorrectly
- LMS synchronization failed

Correction process:

```text id="corr1"

Student Request

↓

Teacher Review

↓

Verification

↓

Attendance Updated

Correction requests should typically be submitted within:

```text id="corr2" 7 Days

---

### # Chapter 12: Attendance Monitoring

Teachers should monitor:

### Weekly Attendance

### Monthly Attendance

### Course Attendance Trends

Indicators:

```text id="monitor1"

Above 90% → Excellent

75-90% → Acceptable

Below 75% → At Risk

---

## Chapter 13: Attendance Warnings

Warning levels:

### Level 1

Attendance below:

```text id="warn1" 80%

Action:

```text id="warn2"

Student Notification

### Level 2

Attendance below:

```text id="warn3" 75%

Action:

```text id="warn4"

Teacher Counseling

## Level 3

Attendance below:

```text id="warn5" 65%

Action:

```text id="warn6"  
Coordinator Review

---

## Chapter 14: Student Intervention Process

When attendance declines:

Workflow:

```text id="intervention1" Identify Student ↓ Notify Student ↓ Counseling Session ↓ Progress Monitoring

The goal is improvement, not punishment.

---

# Chapter 15: Attendance Reports

The LMS can generate:

### Student Attendance Reports

### Batch Attendance Reports

### Course Attendance Reports

### Monthly Attendance Reports

Reports help identify participation patterns and intervention needs.

---

# Chapter 16: Attendance Analytics

Useful metrics:

### Average Attendance

### Attendance Trends

### High-Risk Students

### Batch Comparisons

Examples:

```
```text id="analytics1"
Average Batch Attendance

88%
```

These metrics support academic decision-making.

---

## Chapter 17: Attendance and Assessments

Attendance may contribute to internal assessment scores.

Example:

```
```text id="assess1" Attendance Weight

10%
```

Calculation example:

```
```text id="assess2"
95% Attendance

10/10 Marks
```

Institutions may define specific weighting schemes.

---

## Chapter 18: Online Class Attendance

Online attendance may be verified through:

**Session Join Records**

**Activity Participation**

**LMS Tracking**

**Poll Responses**

**Assignment Completion**

Teachers may use multiple indicators when validating attendance.

---

## Chapter 19: Handling Technical Issues

Common issues:

**Internet Failure**

**LMS Downtime**

**Meeting Link Problems**

**Device Failure**

Students should immediately report issues through official channels.

Teachers should document verified incidents.

---

## Chapter 20: Attendance Appeals

Students may appeal attendance decisions.

Appeal process:

Submit Request ↓ Teacher Review ↓ Coordinator Review ↓ Decision

All decisions should be documented.

---

# Chapter 21: Data Privacy

Attendance data is academic information.

Access should be restricted to:

```
```text id="privacy1"
```

Student

Teacher

Coordinator

Administrator

Attendance information should not be shared publicly.

---

## Chapter 22: Academic Coordinator Responsibilities

Coordinators should:

- Review attendance trends
- Monitor high-risk students
- Support interventions
- Approve attendance exceptions

Regular audits improve attendance accuracy.

---

## Chapter 23: Attendance Compliance

Teachers should:

- Record attendance promptly
- Verify participation
- Maintain accurate records

Failure to follow attendance procedures may impact academic reporting quality.

---

## Chapter 24: Best Practices

**For Teachers**

- Mark attendance immediately
- Verify participation
- Review reports weekly

### **For Students**

- Join on time
- Participate actively
- Track attendance regularly

### **For Coordinators**

- Monitor trends
- Support interventions
- Ensure policy compliance

---

## **Chapter 25: Summary**

Attendance serves as a critical measure of student engagement and academic participation. Consistent attendance monitoring, accurate record keeping, timely interventions, and transparent policies help improve learning outcomes and support student success. This policy ensures fairness, accountability, and consistency across all courses delivered through the LMS.
