

Teaching Guidelines for Instructors

Introduction

This document provides a standardized framework for instructors delivering courses through the Learning Management System (LMS). The objective is to ensure high-quality teaching, consistent student experiences, measurable learning outcomes, and effective academic delivery across all programs.

These guidelines apply to:

- Full-Time Faculty
- Adjunct Faculty
- Guest Lecturers
- Teaching Assistants
- Industry Mentors

The teaching process should focus on:

- Knowledge Delivery
 - Practical Learning
 - Student Engagement
 - Continuous Assessment
 - Professional Development
-

Chapter 1: Role of an Instructor

An instructor's responsibilities extend beyond delivering lectures.

Core responsibilities include:

Academic Responsibilities

- Deliver course content
- Conduct live sessions
- Evaluate assignments
- Monitor student progress
- Provide feedback

Student Support Responsibilities

- Clarify doubts
- Mentor students
- Guide projects

- Encourage participation
- Identify struggling learners

Administrative Responsibilities

- Mark attendance
 - Upload learning materials
 - Maintain academic records
 - Submit reports on time
-

Chapter 2: Teaching Philosophy

Effective teaching should focus on learning outcomes rather than content completion.

Good teaching should:

- Encourage critical thinking
- Promote problem-solving
- Support active learning
- Connect theory with practice
- Foster collaboration

Students should understand:

What to Learn
Why it Matters
How to Apply It

Chapter 3: Course Preparation

Before starting a course:

Review Curriculum

Understand:

- Course objectives
- Module structure
- Assessment requirements
- Expected outcomes

Prepare Resources

Examples:

- Slides
- Notes
- Assignments
- Projects
- Demonstrations

Create Teaching Plan

Prepare:

- Weekly schedule
 - Topics
 - Activities
 - Deadlines
-

Chapter 4: Lesson Planning

Every class should have a clear lesson plan.

Structure:

Introduction (10%)

Explain:

- Topic
- Objectives
- Relevance

Core Learning (70%)

Deliver:

- Concepts
- Examples
- Demonstrations

Recap and Discussion (20%)

Review:

- Key points
- Questions
- Next steps

Example:

```
10 min → Introduction
60 min → Teaching
20 min → Activity
10 min → Discussion
```

Chapter 5: Learning Outcomes

Every module should define measurable outcomes.

Example:

Instead of:

```
Learn React
```

Use:

```
Build reusable React components using Hooks and state management.
```

Good learning outcomes should be:

- Specific
 - Measurable
 - Achievable
 - Relevant
 - Time-bound
-

Chapter 6: Conducting Live Classes

Before Class:

- Verify internet connection
- Check microphone and camera
- Open teaching materials
- Prepare examples

During Class:

- Start on time
- Explain objectives
- Encourage interaction
- Use real-world examples

After Class:

- Share materials
 - Upload recording
 - Assign tasks
-

Chapter 7: Student Engagement

Student participation is essential.

Techniques:

Question-Based Learning

Ask:

Why does this happen?

How would you solve this?

Interactive Discussions

Encourage:

- Questions
- Opinions
- Problem-solving

Practical Activities

Examples:

- Coding exercises
- Case studies
- Group discussions

Chapter 8: Practical Learning

Technical courses should prioritize hands-on practice.

Recommended ratio:

Theory: 40%

Practical: 60%

Examples:

Web Development

- Build applications
- Deploy projects
- Debug code

Data Science

- Analyze datasets
- Create models
- Visualize results

AI Engineering

- Train models
- Build chatbots
- Implement RAG systems

Chapter 9: Assignment Design

Assignments should reinforce learning objectives.

Good assignments:

- Practical
- Relevant
- Progressive

Avoid:

- Pure memorization
- Copy-paste tasks
- Ambiguous instructions

Include:

- Objectives
- Submission requirements
- Evaluation criteria

Chapter 10: Project-Based Learning

Projects help students apply knowledge.

Benefits:

- Real-world experience
- Portfolio building
- Team collaboration

Project stages:

```
Idea
↓
Planning
↓
Development
↓
Testing
↓
Presentation
```

Chapter 11: Assessment Strategy

Recommended distribution:

```
Assignments → 30%  
Projects → 30%  
Attendance → 10%  
Tests → 20%  
Participation → 10%
```

Adjust according to course requirements.

Chapter 12: Providing Feedback

Feedback should be:

- Timely
- Constructive
- Actionable

Bad feedback:

```
Needs improvement.
```

Good feedback:

```
API implementation is correct, but error handling is missing. Add validation and  
improve response structure.
```

Chapter 13: Handling Student Questions

Teachers should:

- Encourage questions
- Respect all learners
- Clarify concepts patiently

If unsure:

I will verify and provide the correct answer in the next session.

Avoid guessing technical information.

Chapter 14: Managing Diverse Learning Levels

Students learn at different speeds.

Categories:

Advanced Learners

Provide:

- Advanced challenges
- Research topics

Average Learners

Provide:

- Regular exercises
- Guided projects

Struggling Learners

Provide:

- Additional support
 - Simplified explanations
 - Mentoring sessions
-

Chapter 15: Classroom Discipline

Maintain professionalism.

Rules:

- Start on time
- End on time
- Respect participants
- Maintain focus

Address disruptions calmly and professionally.

Chapter 16: Academic Integrity

Teachers should actively discourage:

- Plagiarism
- Cheating
- Unauthorized collaboration

Methods:

- Plagiarism checks
- Viva evaluations
- Code reviews

Violations should be documented and reported.

Chapter 17: Attendance Monitoring

Attendance reflects participation.

Teachers should:

- Record attendance accurately
- Verify student participation
- Review attendance reports

Students with low attendance should receive early warnings.

Chapter 18: Mentoring and Career Guidance

Teachers are mentors as well as instructors.

Support students with:

- Career planning
- Interview preparation
- Resume reviews
- Project guidance

Encourage continuous learning.

Chapter 19: Communication Standards

Professional communication should be:

- Respectful
- Clear
- Timely

Respond to student queries within:

24–48 Hours

Use official LMS communication channels whenever possible.

Chapter 20: Online Teaching Best Practices

Recommendations:

- Use stable internet
- Share visuals
- Encourage participation
- Record sessions
- Use breakout discussions when appropriate

Avoid:

- Reading slides directly
 - Monologue-style teaching
 - Ignoring student questions
-

Chapter 21: Continuous Improvement

Teachers should continuously improve through:

- Student feedback
- Peer reviews
- Industry updates
- Professional certifications

Recommended activities:

- Technical workshops
 - Research reading
 - Community participation
-

Chapter 22: Course Completion Process

At course completion:

Review Outcomes

Verify:

- Learning objectives achieved
- Assessments completed

Submit Reports

Include:

- Attendance summary
- Grade summary
- Feedback report

Archive Resources

Store:

- Recordings
 - Assignments
 - Evaluation data
-

Chapter 23: Instructor Performance Indicators

Evaluation metrics may include:

- Student satisfaction
- Attendance rates
- Assignment completion rates
- Course completion rates
- Assessment quality

These metrics support teaching excellence and continuous improvement.

Summary

Effective teaching combines subject expertise, communication skills, student engagement, mentorship, and continuous assessment. Instructors should focus on learning outcomes, practical application, academic integrity, and student success. By following these guidelines, educators can create an engaging and productive learning environment that prepares students for academic and professional growth.
